## QTRS Environmental policy 2020

### POLICY

QTRS Pty Ltd states in Article 1 of its Corporate Policy that "Contributing to the advancement of society through business activities while adhering to the belief that the customer comes first" and its primary mission is to contribute to the development of society through its business activities, including research and development and production.

Accordingly, our company, recognizes that a company is a member of society when conducting its business, and strives to reduce the environmental burden in all areas of its business activities. At the same time, our company contributes to the creation of a society capable of sustainable development by developing technologies and products that protect and protect the environment by combining its comprehensive technological capabilities.

### CODE OF CONDUCT

1. We regard environmental conservation and protection as one of the most important management issues, and we will work to improve these issues on a company-wide basis.
2. Establish an environmental conservation organization system and environment-related regulations to clarify roles and responsibilities for environmental conservation and protection.
3. In all areas of our business activities, including product research and development, design, procurement of raw materials, manufacturing, transportation, use, service, and disposal, we will strive to reduce environmental impact by preventing pollution, conserving resources, saving energy, and reducing waste generation.
4. Strive to develop and provide highly reliable technologies and products that contribute to solving environmental and energy problems.
5. In addition to complying with environmental laws, regulations, etc., we will establish, operate, and evaluate voluntary standards as necessary, and set environmental objectives and targets to continuously improve and improve our environmental conservation and protection activities.
6. We will endeavour to preserve and protect the environment by gaining the understanding of our stakeholders and cooperating with them.
7. We will raise the environmental awareness of all employees through environmental education, and actively promote public relations and social contribution activities such as the provision of environmental information.
